Developed with direct input from Headteachers & Network Managers

Kirit Shah, Sales Director
Go Education Ltd

Designed and developed in the UK by Go Education Ltd. with direct input from Headteachers and Network Managers, the BVS ECOtouch Interactive Touch Screens were launched in the UK in 2014 with the aim of providing quality and value to schools.

Over the period, we have developed a range of affordable installed packages to meet the schools' individual requirements and to further enable them to make the switch from projector based whiteboard systems as seamless as possible.

Manufactured using state of the art technology, the BVS screens come with a 7 year warranty as well as free delivery anywhere on mainland UK. All warranties and support are handled by a UK based team of technicians and engineers, while Installations are carried out by skilled and highly trained installation engineers.

The current ETA series come in 3 sizes, 65" being the most popular and meeting the requirements of the majority of classrooms. The 70" is suitable for very large classrooms such as science labs, whilst the 55" works best for Senco, small meeting areas and small nursery classrooms.

Used by schools across the country, the BVS screens have rapidly gained recognition as being amongst the best for quality, value and reliability. This is evidenced by the many exemplary testimonials, some of which are reproduced in this brochure.

I am confident a BVS ECOtouch solution can prove to be an excellent investment for any school. Realising the ever present budgetary constraints that schools face, we have ensured that all BVS solutions can also be acquired under a DfE approved operating lease, thus minimising the outlay.

For advice or more information on the BVS range, to obtain a quote or to place an order, please contact any of our authorised resellers listed on the back.

Len Hazlehurst, Headteacher,
Straits Primary School

Six years ago, I wanted to replace the failing interactive whiteboards and saw the first touch screens at an exhibition. These would have been perfect for our needs but, priced at between £3500 and £4500, we simply could not have afforded them.

I therefore had a chat with Go Education, an established supplier in the education sector, about the possibility of touch screens being developed so as to be available at around the £2500 price, which would have made them affordable for schools. At the same time, I offered my services to act as an advisor to Go Education and, together with input from other schools' Heads and Network Managers, the technical team at Go Education was successfully able to develop the BVS ECOtouch.

To date, in my school, we have had 6 classrooms equipped with the 65" BVS screens. The teachers have been delighted with them and the children love them.

The 65" screens meet the needs of teachers and are at sensible prices that schools can afford. The screen

quality is superb and I cannot tell the difference between the BVS ECOtouch and other more expensive brands that I have seen for obvious reasons - I am obliged to look at alternatives and get alternative quotes for best practice.

I am pleased that the BVS screens are now also available under an Operating Lease as it considerably reduces the outlay. I am considering going down this route to replace the rest of the old whiteboards with the BVS Touch Screens together with the 60 Student Netbooks as we simply do not have any money left for capital purchases. Operating Leases with 3 Yearly refreshes are the way forward for all ICT equipment, even more so when budgets are diminishing!

I wholeheartedly recommend BVS Touch Screens to any school that is considering replacing the old projector based interactive whiteboards.

Of all the major brands of touch screens we supply into UK schools, BVS are our favourite!

They have hit the sweet spot for build quality, features and (the all-important) value for money and are a real joy to install and use.

I would definitely recommend BVS screens to anyone!

James Hartle, Blue Gecko It

DELIVERY & INSTALLATION*

Installing an interactive touch screen is just a small part of the many arrangements that every school has to make when replacing existing Interactive whiteboards. Our Premium packages take this hassle out.

✓ Non-kerbside delivery (FREE)

We realise that, whilst taking delivery of new touch screens, schools are often faced with the difficult task of moving the heavy screens from the kerbside drops to the classrooms, due to a lack of manpower. To solve this problem, all Premium packages now include non-kerbside screen delivery direct to the classroom. All screens will be brought to site by the installers on the day of installation.

✓ De-installation of old equipment

Your old equipment will be de-installed (provided it is at a safe working height of 2.7m).

✓ Professional workmanship - all our engineers are

- Chas accredited & DBS checked.
- Carry CSCS cards.
- PASMA, Ipaf, CIBT, SSST certified.
- Asbestos awareness trained.
- Ladder trained.

In addition, the Premium 2 & 4 packages include:

✓ Removal & recycling of old equipment

✓ Removal & recycling of all packaging

*Mainland UK excluding the Scottish Highlands

I have been very pleased with the products and level of service from Go Education. The 7 BVS 65" touch screens they have provided are high quality and very good value for money, and the customer care has been excellent. The widescreen 1080p HD 65" BVS Touch Screens are a perfect replacement for old projector based 77" interactive whiteboards. Their installation engineers were very polite, arrived on time, brought the screens with them, carried out an excellent installation, de-installed the old equipment and took away the packaging and old equipment. I would strongly recommend Go Education to any school looking to purchase touch screens and other ICT products.

Owen Rhodes, Beaupre Primary School

We've been very impressed from the outset at the very high level of customer service and the unbeatable prices we have received from Go Education. The 14 BVS ECOtouch screens are in place now and children and staff love them as they're so multi-functional and of such good quality. I can confidently say that Go Education is one of the very few major school suppliers that can boast a personal approach and that understand the requirement of schools and the tight, diminishing budgets. They are certainly our preferred supplier

Holden Clough Community Primary School

EMPOWER WITH TRAINING

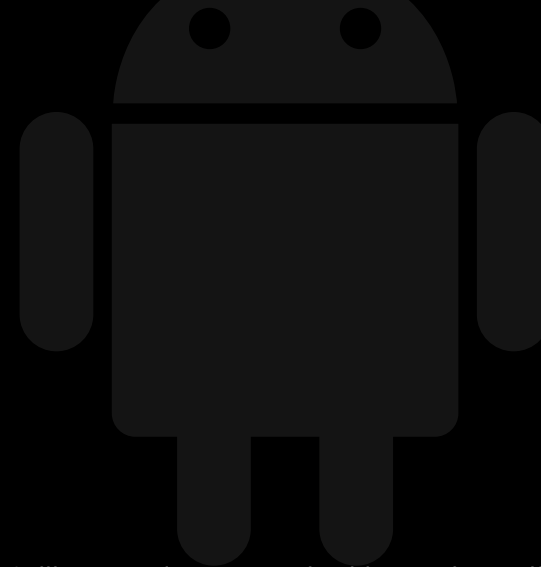

Each purchase of a BVS ECOtouch ETA Premium 2 or 4 package entitles one teacher to attend a live online workshop.

From discussions with many headteachers and network managers, we realise that interactive equipment purchased by schools is not always being used to its full potential. This is often due to inadequate training.

These workshops have been designed to give teachers a head start in preparing and presenting lesson plans. Each workshop lasts approximately 1.5 hours and allows the participating teacher to ask questions throughout. Upon completion of the online training workshop, the participating teacher will receive a Certificate.

Online workshops do not cover hardware training. However, as part of the installation process, BVS installation engineers give an overview of the BVS Touch Screen and also demonstrate wireless connectivity with a student device.

We have partnered with Gaia Technologies plc to provide training via Online workshops.

Our old Smart Boards and projectors were gradually failing and we needed to replace them. The prices we were quoted by our supplier for other interactive touch screens were at least £1000 more than the offer for an equivalent quality BVS ECOtouch.

From my initial contact to the subsequent order, delivery and installation of our first BVS touch screen, we have been delighted with the service, product knowledge and cost of the equipment. The skilled engineers who installed the touch screens were extremely polite, worked quickly and efficiently.

We have since gone onto to have nine more BVS ECOtouch screens installed and each time, have been extremely delighted with the product.

Judith Buckley, Holymead Primary School

BUY OR RENT

As an alternative to outright purchase, all BVS ECOtouch packages can be acquired via a 3 Year Operating Lease.

To facilitate Operating Leases, we have partnered with Unilink Finance Ltd. All leases are provided by either CHG Meridian or Siemens.

KEY BENEFITS OF RENTAL

- ✓ Fraction of the cost otherwise incurred on an outright purchase in any one year.
- ✓ Allows schools to acquire almost 4 times the amount of equipment for the same outlay.
- ✓ Frees up much needed capital for use in other areas.
- ✓ Is particularly appropriate for equipment that has a relatively short useful working life. Particularly relevant to ICT equipment.
- ✓ With a regular 3 yearly refresh of your ICT equipment, you are never stuck with redundant equipment!

Operating Leases are the only form of leasing compliant with DfE recommendations for state schools and academies.

ETA SERIES KEY FEATURES

- ✓ 10 point touch
- ✓ Anti-glare toughened glass
- ✓ Built-in speakers
- ✓ Freeze frame
- ✓ Full HD 1080p wide screen
- ✓ 7 year warranty
- ✓ Built-in Android PC
- ✓ Integrated 16GB storage
- ✓ Integrated browser & whiteboard
- ✓ Integrated Wi-Fi
- ✓ Wireless mirroring
- ✓ Optional Windows OPS PC

Interim Teacher Assessment Framework for the end of Key Stage 2 - writing

Working at the expected standard

Hardware

Stunning Enclosure

The flawless enclosure is crafted from black aluminium and assembled in segments so the enclosure can remain sexy and sleek with its rounded corners.

Connectivity

The rear of the screen features AV inputs that allow for more permanent connections such as AV in and out, Audio in and out, RS-232, VGA, DP, SPDIF, HDMI, YPbPr, USB.

Etched Glass

Improves tactility for smooth touch gestures. The anti-glare nano coating also diffuses external light so that images and videos are much clearer.

Easy Access Ports and Controls

Quickly and conveniently connect your own laptop to the screen using the front facing HDMI and Touch USB ports. There are also USB ports connected to the internal PC for easy access.

Built-in Android PC

Featuring a powerful integrated PC running Android 5.0 with 2GB RAM and 16GB ROM.

10-Point Infrared Touch Technology

Using the most durable and robust commercial touch technology available. Use anything such as your finger, or one of the styluses included, as your pointer.

Power/Menu Buttons

Free MeetingPad Software

State of the art 'MeetingPad' Software brings the Interactive Touch Display to life. No additional hardware is required as you wireless mirror and fileshare between your devices and the screen. The wireless features are all compatible with Android, Apple and Windows devices and even allow you to annotate the screen from your device.

Optional OPS PC

For a seamless solution an OPS PC can be integrated into the rear of the display. This allows you the flexibility to choose between Android and Windows and switch effortlessly between the two. Available with a cost effective OPS PC or a more powerful OPS PC.

LED Backlight

The long lasting eco-friendly LED backlight focusses on optimum brightness and contrast; causing no eye strain as you would get from projectors. The panel and backlight have a lifespan in excess of 80,000 hours.

Freeze Frame Function

While your laptop is connected you can freeze the image on screen so that you can continue to work independently on your laptop.

Styluses Included

2 special 'Smart Pens', an extendable wand and 2 extra magnetic styluses are included.

Free MeetingPad Software

Multiplatform Compatibility

Android, Apple and Windows devices are compatible to connect with 'MeetingPad'

Unlimited Connections

There is no limit to the amount of mobile devices that can simultaneously connect wirelessly to the screen.

Wireless Mirroring

Connect to the Touch Screen from any smartphone, tablet, laptop, PC or Mac wirelessly. Using mobile devices you can mirror the display in both directions, and even take control of the Touch Screen, from anywhere on the same Wi-Fi network. Mirroring via 5GHz allows users the best wireless experience available with fast mirroring and less interference. All of this without the need of additional wires or transmitters.

File Sharing

Once your device and the Touch Screen are wirelessly connected you can quickly and easily share content to and from your device. Use the Eshare app to show videos, images and audio files stored on your smartphone, tablet, laptop or PC. You can also share files from the Touch Screen to your device using various methods such as email or scanning a QR code. Files can easily flow between the Touch Screen and your devices.

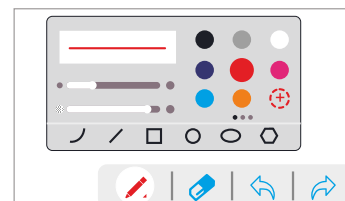

No Additional Hardware Required

Wirelessly mirror and share files straight from your device without the need for any additional hardware, such as transmitters or wires. However there is a handy Screen Projection Dongle USB included that makes mirroring from your PC or Mac fast and simple, without the need to install any software.

www.bvstouchscreens.com

Flexible Working Tools

Personalise your experience by changing the background colour of the display, as well as the colour, thickness and opacity of the lines with your drawing tools.

Annotations

Make notes on your existing documents, screenshots and even web pages. Expand and innovate your content with ideas and concepts.

Whiteboard

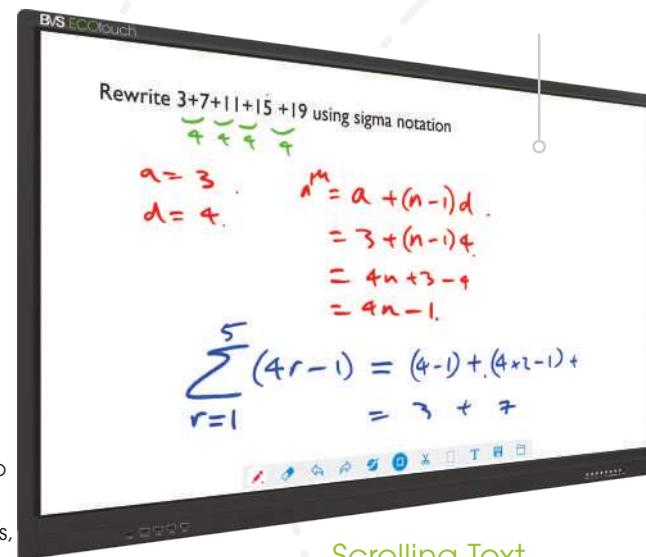

Replaces the traditional marker board in meeting rooms and classrooms. Annotate, draw and create meeting magic with the ultimate presentation tool.

Unlimited Connections

There is no limit to the amount of mobile devices that can simultaneously connect wirelessly to the screen.

Snipping Tool

Crop segments of the display to shift focus to more important sections of documents, screenshots or webpages.

Smart Pen Stylus

There are two interactive 'Smart Pens' included. These special styluses allows you to control the display wirelessly from anywhere in the room. You can change the pen tool colour, save annotated documents, navigate through a PowerPoint presentation and go back to the 'MeetingPad' home screen.

Web Browser

Surf the web with the integrated internet browser.

Scrolling Text

The marquee text tool is fun and innovative way to make important messages stand out, such as setting up welcome messages for your visitors.

info@bvstouchscreens.com

“

The supplier provided us with an excellent product at an excellent price, but what was most exceptional was the after-sales service. When we had a problem with our device, a replacement was brought out to us the very next day. This meant our teachers and students were able to continue teaching and learning with no interruption.

The Ridge Primary School

”

“

The BVS Touch Screen that was supplied and installed by Remedian is brilliant. It has excellent clarity and very fast responsiveness. There is no need to calibrate and, because no projector is needed, it can be positioned at a perfect height for the children to use.

Children and staff love it. It is just like having a massive iPad on a wall. Nursery cannot wait for theirs to be installed!

St. Johns CE Primary School
