Update Firmware on Meeting Pad via USB – 55 Inch F Series Only

Revision date: 22/12/2017

Instructions

> ℹ️ *Please read entire instruction sheet before you start.*

Tools Needed:

- 1 Blank USB Memory Stick (minimum 1 GB capacity and FAT32 formatted)

Step 1

Download the firmware from the following link:

https://www.dropbox.com/s/n3nz8yd0vb7a8ih/50%2670_MeetingPad_14122017_V7.9.zip?dl=0

Step 2

Extract the .bin file from the .zip and copy it onto the blank USB stick.

Step 3

Turn the screen off with the power button on the remote if it is not off already.

Step 4

Remove all peripherals from the screen except for the power cable, and insert the USB into one of the USB ports on the back as illustrated below.

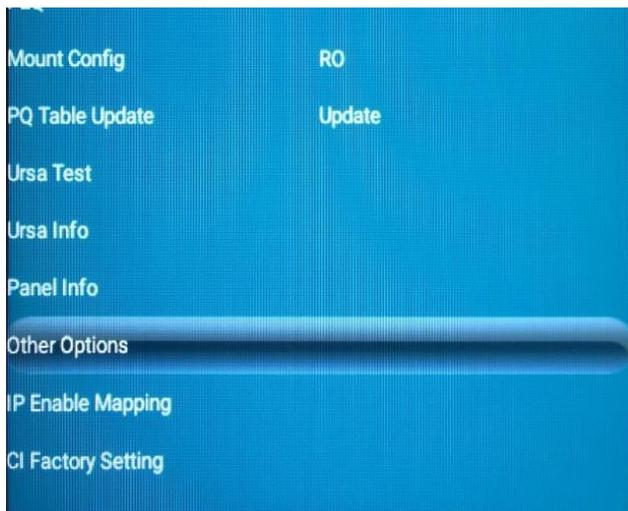

Step 5

Turn the screen on, and press "INPUT" on the remote control to bring up the source menu, immediately followed by "2, 5, 8, 0" on the remote to bring up the Design Menu.
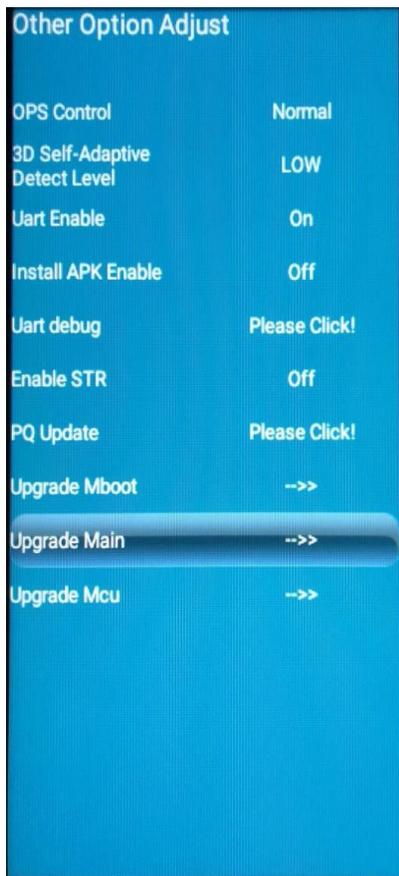

Step 6

Navigate down to "Other Options" and select it.

Step 7

On the "Other Options" menu, scroll down using the arrows until you find "Update Main".
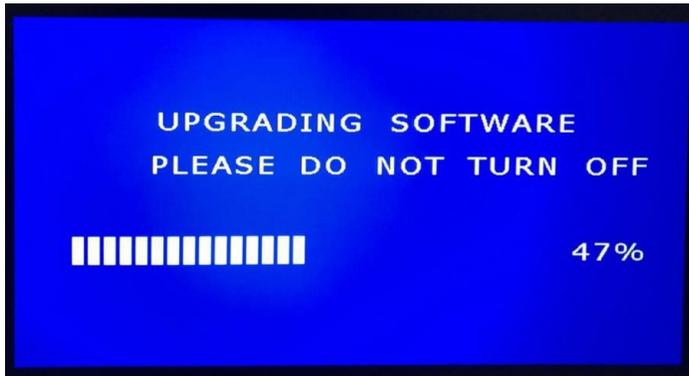

Step 8

When prompted, press "Confirm" to proceed with the update.

Step 9

A blue update screen will now appear. Do not turn the screen off during this process.

Step 10

Once this is finished, the screen will turn itself off after reaching 100%.

Step 11

Unplug the USB stick from the screen and turn the screen on by pressing the power button on the remote.

Step 12

The first boot after this will be significantly longer; be patient and do not turn the screen off.
